

„People Are People“

... getting again a view on us ..

Hey, managers on botmasters! Do you try to help? So much stupid access on j-log.eu by bots.

People.. apes with more intelligence? Looks like: NO. The way the technical world is developing seems to show it.. It drives development amidst rapidly increasing division of labor under Mgmt operating without a "line-and-staff" system—while simultaneously leading to widespread adoption and use by virtually everyone.

Well.. Internet from '90s on opened a Goebbels-Schnauze Reading — Believing as Knowing. As well “thanks” to IBM Simon for first Smartphone. ☺

Now the human so-called “intelligence” is controlling + using Artificial Intelligence. The output is to be believed – as “knowledge”.

Therefore, THANK YOU to stupid botmaster managers! Blind acting, no criminal success, only “soldiers” now blocked by that. - And Google’s search engine with AI makes resulting intelligent view on it: *“The j-log.eu website was severely compromised by a cyberattack that led to the permanent destruction of its server and the loss of its official support forum.”* BULLSHIT

◆ Übersicht mit KI

Die Website **j-log.eu** (bekannt für die RC-Modellbau-Datenlogger JLog und S32) **ist nach einem schweren Serververlust und Cyberangriff dauerhaft offline**. Das offizielle Support-Forum funktioniert nur noch als statisches Archiv von Web-Cidatern, und Logins oder Downloads sind nicht mehr aktiv.  j-log.eu +1

Möchtest du wissen, ob es **alternative Bezugsquellen** für alte Firmware-Dateien gibt oder suchst du nach **Ersatz-Loggern** für dein RC-Modell?

BULLSHIT

More and more .. view without self-critical system perspective.

AI amplifies it: Unintelligent use of Human Intelligence.

More and more blind by more and more “view”. Enjoy it  "Planet Of The Apes" on the way ..
